PLANNED PROGRAM

Climate Change & Biodiversity Academy

Climate literacy, environmental assessment, and ecosystem stewardship.

Program status: Planned

This academy is in the planning stage. Courses and credential opportunities in this brochure are proposed and subject to confirmation. Tuition, start dates, duration, prerequisites, and delivery format are shared only once confirmed.

About this academy

The Climate Change & Biodiversity Academy is planned for learners who want to understand climate risk, assess environmental impacts, and help restore ecosystems.

Proposed topics include climate fundamentals, risk and impact assessment, the Sustainable Development Goals, biodiversity conservation, carbon accounting, and ecosystem restoration.

Proposed courses (7)

On screen, select a course title to register your interest in that course.
