PLANNED PROGRAM

Green Technology & Smart Systems Academy

Digital tools, sensors, analytics, and intelligent sustainability systems.

Program status: Planned

This academy is in the planning stage. Courses and credential opportunities in this brochure are proposed and subject to confirmation. Tuition, start dates, duration, prerequisites, and delivery format are shared only once confirmed.

About this academy

This academy is planned for learners who want to apply digital technology to sustainability — measuring, monitoring, and optimizing how buildings, cities, and ecosystems perform.

Proposed coursework covers green technology foundations, the Internet of Things, environmental monitoring, smart buildings, sensors, AI for environmental management, and infrastructure analytics.

Proposed courses (7)

On screen, select a course title to register your interest in that course.

01	Introduction to Green Technology	PLANNED
02	Internet of Things (IoT)	PLANNED
03	Environmental Monitoring Systems	PLANNED
04	Smart Building Technologies	PLANNED
05	Sensor Technologies for Sustainability	PLANNED
06	AI for Environmental Management	PLANNED
07	Data Analytics for Green Infrastructure	PLANNED

Proposed credential opportunities

- Smart Technology Technician (proposed)
- IoT for Sustainability Professional (proposed)

Proposed credential opportunities are planned titles only. They are not evidence of recognized certification, accreditation, or authorization to award degrees, and will be confirmed before any program opens.

Career pathways

Related career interests for learners in this academy:

- Smart building systems
- Sustainability data analysis
- Environmental sensing and monitoring
- Connected device installation

Catalog career-interest areas covered: Data & digital technology, Hands-on installation & trades, Environmental field work, Operations & maintenance, Planning, policy & resilience.

A Workforce Development Hub is planned to connect learners with an employer job board, internships, apprenticeship matching, mentoring, and resume and interview preparation. These services are not yet active.

Career interests describe related fields of work. They are not a promise of employment, internships, salaries, or job placement.
